Resuscitation, 25 (1993) 293–295
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 25 (1993)

ACTH-(1-24), hemorrhagic shock, methylprednisolone, aprotinin, norepinephrine, shock treatment, rat, 219
adrenaline, cardiac index, intrapulmonary shunt, isoproterenol, methoxamine, noradrenaline, 203
amino acids, cardiac arrest, cardiopulmonary cerebral resuscitation, charcoal hemoperfusion, detoxification, global brain ischemia, 137
animal model (rat), ATP-$MgCl_2$ pre-treatment, asphyxial arrest, hemodynamic response, heart rate, mean arterial pressure, 109
aprotinin, hemorrhagic shock, ACTH-(1-24), methylprednisolone, norepinephrine, shock treatment, rat, 219
arrhythmias, cardiopulmonary resuscitation, cardiovascular function, cerebral resuscitation, neurologic outcome, myocardial ischemia, 9
asphyxial arrest, ATP-$MgCl_2$ pre-treatment, animal model (rat), hemodynamic response, heart rate, mean arterial pressure, 109
ATP-$MgCl_2$ pre-treatment, animal model (rat), asphyxial arrest, hemodynamic response, heart rate, mean arterial pressure, 109

basic cardiopulmonary resuscitation (CPR), bystander, outcome, partial correlation, 227
basic support, equipment, emergency airway, laryngeal mask, resuscitation, 245
bystander, basic cardiopulmonary resuscitation (CPR), outcome, partial correlation, 227

cardiac arrest, amino acids, cardiopulmonary cerebral resuscitation, charcoal hemoperfusion, detoxification, global brain ischemia, 137
cardiac arrest, cardiopulmonary bypass, cardiopulmonary-cerebral resuscitation, laser-Doppler flowmetry, neurologic outcome, 265
cardiac arrest, prolonged cardiac massage, extracorporeal life support, 35
cardiac arrest, resuscitation, corticosteroids, 257
cardiac arrest, resuscitation, outcome, prognosis factors, 171
cardiac index, adrenaline, intrapulmonary shunt, isoproterenol, methoxamine, noradrenaline, 203
cardiopulmonary bypass, cardiac arrest, cardiopulmonary-cerebral resuscitation, laser-Doppler flowmetry, neurologic outcome, 265
cardiopulmonary cerebral resuscitation, amino acids, cardiac arrest, charcoal hemoperfusion, detoxification, global brain ischemia, 137
cardiopulmonary resuscitation (CPR), ethics, resuscitation, medicolegal, death, CPR policy, 1
cardiopulmonary resuscitation, arrhythmias, cardiovascular function, cerebral resuscitation, neurologic outcome, myocardial ischemia, 9
cardiopulmonary resuscitation, cerebral resuscitation, coagulation, hepatic failure, renal failure, septicemia, 119
cardiopulmonary resuscitation, epinephrine, high dose, 283
cardiopulmonary-cerebral resuscitation, cardiac arrest, cardiopulmonary bypass, laser-Doppler flowmetry, neurologic outcome, 265
cardiovascular function, arrhythmias, cardiopulmonary resuscitation, cerebral resuscitation, neurologic outcome, myocardial ischemia, 9
cerebral ischemia transient, protein synthesis, nerve tissue proteins, reperfusion injury, 161
cerebral ischemia, nimodipine, neurological deficit, histopathology, 59
cerebral ischemia, stroke, nimodipine, design, cost-benifit, 73
cerebral resuscitation, arrhythmias, cardiopulmonary resuscitation, cardiovascular function, neurologic outcome, myocardial ischemia, 9
cerebral resuscitation, cardiopulmonary resuscitation, coagulation, hepatic failure, renal failure, septicemia, 119
charcoal hemoperfusion, amino acids, cardiac arrest, cardiopulmonary cerebral resuscitation, detoxification, global brain ischemia, 137
clinical death, terminal states, neurologic regula-

tion of physiologic functions, euthanasia, ethical problems in reanimatology, 99
coagulation, cardiopulmonary resuscitation, cerebral resuscitation, hepatic failure, renal failure, septicemia, 119
colloids, hypertonic saline, shock, hemorrhage, dextran, hydroxyethyl starch, 41
coma scales, paediatric resuscitation, 285
corticosteroids, cardiac arrest, resuscitation, 257
cost-benifit, cerebral ischemia, stroke, nimodipine, design, 73
CPR policy, ethics, resuscitation, cardiopulmonary resuscitation (CPR), medicolegal, death, 1
cytokines, tumor necrosis factor, hemorrhage, macrophages, shock, mediators, 249

death, ethics, resuscitation, cardiopulmonary resuscitation (CPR), medicolegal, CPR policy, 1
detoxification, amino acids, cardiac arrest, cardiopulmonary cerebral resuscitation, charcoal hemoperfusion, global brain ischemia, 137
design, cerebral ischemia, stroke, nimodipine, cost-benifit, 73
dextran, hypertonic saline, shock, hemorrhage, colloids, hydroxyethyl starch, 41
dose, epinephrine, neonatal, resuscitation, 235

emergency airway, equipment, laryngeal mask, resuscitation, basic support, 245
epinephrine, cardiopulmonary resuscitation, high dose, 283
epinephrine, neonatal, resuscitation, dose, 235
equipment, emergency airway, laryngeal mask, resuscitation, basic support, 245
ethical problems in reanimatology, clinical death, terminal states, neurologic regulation of physiologic functions, euthanasia, 99
ethics, resuscitation, cardiopulmonary resuscitation (CPR), medicolegal, death, CPR policy, 1
euthanasia, clinical death, terminal states, neurologic regulation of physiologic functions, ethical problems in reanimatology, 99
extracorporeal life support, cardiac arrest, prolonged cardiac massage, 35

global brain ischemia, amino acids, cardiac arrest, cardiopulmonary cerebral resuscitation, charcoal hemoperfusion, detoxification, 137

heart rate, ATP-$MgCl_2$ pre-treatment, animal model (rat), asphyxial arrest, hemodynamic response, mean arterial pressure, 109
hemodynamic response, ATP-$MgCl_2$ pre-treatment, animal model (rat), asphyxial arrest, heart rate, mean arterial pressure, 109
hemorrhage, hypertonic saline, shock, colloids, dextran, hydroxyethyl starch, 41
hemorrhage, tumor necrosis factor, macrophages, shock, cytokines, mediators, 249
hemorrhagic shock, ACTH-(1-24), methylprednisolone, aprotinin, norepinephrine, shock treatment, rat, 219
hepatic failure, cardiopulmonary resuscitation, cerebral resuscitation, coagulation, renal failure, septicemia, 119
high dose, cardiopulmonary resuscitation, epinephrine, 283
histopathology, nimodipine, cerebral ischemia, neurological deficit, 59
hydroxyethyl starch, hypertonic saline, shock, hemorrhage, colloids, dextran, 41
hypertonic saline, shock, hemorrhage, colloids, dextran, hydroxyethyl starch, 41

intrapulmonary shunt, cardiac index, adrenaline, isoproterenol, methoxamine, noradrenaline, 203
isoproterenol, cardiac index, adrenaline, intrapulmonary shunt, methoxamine, noradrenaline, 203

laryngeal mask, equipment, emergency airway, resuscitation, basic support, 245
laser-Doppler flowmetry, cardiac arrest, cardiopulmonary bypass, cardiopulmonary-cerebral resuscitation, neurologic outcome, 265

macrophages, tumor necrosis factor, hemorrhage, shock, cytokines, mediators, 249
mean arterial pressure, ATP-$MgCl_2$ pretreatment, animal model (rat), asphyxial arrest, hemodynamic response, heart rate, 109
mediators, tumor necrosis factor, hemorrhage, macrophages, shock, cytokines, 249
medicolegal, ethics, resuscitation, cardiopulmonary resuscitation (CPR), death, CPR policy, 1
methoxamine, cardiac index, adrenaline, intrapulmonary shunt, isoproterenol, noradrenaline, 203
methylprednisolone, hemorrhagic shock, ACTH-(1-24), aprotinin, norepinephrine, shock treatment, rat, 219

myocardial ischemia, arrhythmias, cardiopulmonary resuscitation, cardiovascular function, cerebral resuscitation, neurologic outcome, 9

neonatal, epinephrine, resuscitation, dose, 235
nerve tissue proteins, cerebral ischemia transient, protein synthesis, reperfusion injury, 161
neurologic outcome, arrhythmias, cardiopulmonary resuscitation, cardiovascular function, cerebral resuscitation, myocardial ischemia, 9
neurologic outcome, cardiac arrest, cardiopulmonary bypass, cardiopulmonary-cerebral resuscitation, laser-Doppler flowmetry, 265
neurologic regulation of physiologic functions, clinical death, terminal states, euthanasia, ethical problems in reanimatology, 99
neurological deficit, nimodipine, cerebral ischemia, histopathology, 59
nimodipine, cerebral ischemia, neurological deficit, histopathology, 59
nimodipine, cerebral ischemia, stroke, design, cost-benifit, 73
noradrenaline, cardiac index, adrenaline, intrapulmonary shunt, isoproterenol, methoxamine, 203
norepinephrine, hemorrhagic shock, ACTH-(1-24), methylprednisolone, aprotinin, shock treatment, rat, 219

outcome, basic cardiopulmonary resuscitation (CPR), bystander, partial correlation, 227
outcome, cardiac arrest, resuscitation, prognosis factors, 171

paediatric resuscitation, coma scales, 285
partial correlation, basic cardiopulmonary resuscitation (CPR), bystander, outcome, 227
prognosis factors, cardiac arrest, resuscitation, outcome, 171
prolonged cardiac massage, cardiac arrest, extracorporeal life support, 35
protein synthesis, cerebral ischemia transient, nerve tissue proteins, reperfusion injury, 161

rat, hemorrhagic shock, ACTH-(1-24), methylprednisolone, aprotinin, norepinephrine, shock treatment, 219
renal failure, cardiopulmonary resuscitation, cerebral resuscitation, coagulation, hepatic failure, septicemia, 119
reperfusion injury, cerebral ischemia transient, protein synthesis, nerve tissue proteins, 161
resuscitation, cardiac arrest, corticosteroids, 257
resuscitation, cardiac arrest, outcome, prognosis factors, 171
resuscitation, epinephrine, neonatal, dose, 235
resuscitation, equipment, emergency airway, laryngeal mask, basic support, 245
resuscitation, ethics, cardiopulmonary resuscitation (CPR), medicolegal, death, CPR policy, 1

septicemia, cardiopulmonary resuscitation, cerebral resuscitation, coagulation, hepatic failure, renal failure, 119
shock treatment, hemorrhagic shock, ACTH-(1-24), methylprednisolone, aprotinin, norepinephrine, rat, 219
shock, hypertonic saline, hemorrhage, colloids, dextran, hydroxyethyl starch, 41
shock, tumor necrosis factor, hemorrhage, macrophages, cytokines, mediators, 249
stroke, cerebral ischemia, nimodipine, design, cost-benifit, 73

terminal states, clinical death, neurologic regulation of physiologic functions, euthanasia, ethical problems in reanimatology, 99
tumor necrosis factor, hemorrhage, macrophages, shock, cytokines, mediators, 249
